Profile

Data scientist with previous commercial experience as a software engineer in companies ranging from startups to large e-commerce companies. Able to bring together experience from both fields to deliver impactful business solutions. Use Python and libraries such as Pandas, NumPy as well as Tableau, Airflow, AWS, and NoSQL technologies. Looking for a data scientist role in a company where I can work on interesting problems and flourish in my career.

Experience

Consultant Data Scientist

Nov 2019 (current)

CybSafe, London

- Scoped and outlined data components of major B2B product, performing all data science work independently
- Consultation and development of KPIs, metrics, and dashboarding for multiple initiatives
